(C/O Pelvic & Acetabular course)
AIMS & SCOPES

This course is focused on the management of patients with fractures to the Pelvis and Acetabulum. The full spectrum of the evaluation, diagnostic work up, and treatment options of these fractures will be covered. An integrated multidisciplinary approach to comprehensive treatment is provided by a renowned faculty of experts. Surgical approaches will be practiced on cadaveric stations. In addition to lectures and workshops, interactive sessions foresee the discussion of clinical scenarios, their optimal management along with case presentations.

TOPICS TO INCLUDE

PELVIC RING

Anatomy and Radiology
Cadaveric Dissections of the most common pelvic approaches
Classification Injury
Approaches Anterior and Posterior
Principles of management
