Mr Alan Middleton
Consultant Hand Surgeon

Additional faculty to be confirmed

TARGET AUDIENCE:

- Senior Trainees (ST5+)
 - Fellows
- New consultants with a keen interest in hand surgery and wishing to improve their operative skill in managing hand fractures.

SPECIAL FEATURES OF THIS COURSE:

- High faculty-to-participant ratio.
- Fresh frozen cadaveric specimens.
 - Intensive two day course.
- Number of attendees limited to 16 dissector places.
- Ratio of 2 delegates per cadaveric specimen.
- Interactive classroom and cadaver instruction.

Lunch and all refreshments included.

Course certificate upon completion.

This course is based on trainees rotating through specifically designed skill stations. These will be interspersed by a few short didactic lectures.

Practical Sessions:

- Approaches to the hand specific for fracture fixation around the hand and wrist.
- Phalanges, metacarpals and carpus.
- Acute scaphoid fracture - approaches and compression screw placement.

Learning Objectives:

- Anatomy of the hand and wrist with specific reference to fracture fixation.
 - Imaging of the hand and wrist.
- Surgical approaches to the fingers and carpus.
- Acute fracture management - non-displaced and displaced.
- Scaphoid fracture - presentation and operative fixation options. Salvage procedures.
